Subject: PFAS EJ Screen Follow Up

---

Hi Chan and Patrick,

Thank you for your input on the timeline and interview questions for the FF PFAS EJ screening! Dustan and I were able to meet with Monica and Cal for some feedback on the project and to learn about what other regions were doing. We can share what we learned with you in our next meeting. Since Whidbey and JBLM have their own concerns and site characteristics, we are thinking it would be best to meet with you each separately moving forward. Would you each be available for a meeting with Dustan and I next week? For the meeting, it would be helpful to have any PFAS plume maps or maps of discrete PFAS sample points (like from PA-SI, source evaluation, or RI report), the community involvement plan (if you have one), and list of potential interview candidates based on your knowledge of the site.

Thank you!

Erin Gleason
